Active Share – Thomson Reuters – Readme – May 3, 2022

Time Period

Quarterly from June 1979 to December 2019

Fund IDs

fundno – Thomson Reuters
wficn – MFLinks

Date ID

ym – Year-month

Data Prep Variables

The initial holdings count (initial_holding_count) in Thomson Reuters is recorded for each fund snapshot.

We then:
  (i)   require each position have available a CUSIP and the number of shares held,
  (ii)   merge with the CRSP stock database,
  (iii)   collapse the data from the CUSIP level to the PERMCO level.

The final holdings count (final_holding_count) is then recorded for each fund snapshot.

Holdings Descriptors

total_assets – Sum of the assets in each fund snapshot

max_weight – The largest holding in each fund snapshot (in % of assets)

shrcd_X – Count of holdings in each fund snapshot with share code X (in % of positions)

as_X – The active share of each fund snapshot relative to benchmark X
        -Calculation excludes non-equity positions and positions that failed to merge
        -Variable is set to missing if the benchmark was unavailable at that time

Benchmark List and Date Range

Benchmark	Full Name	Start	End
R1	Russell 1000	1979m3	2019m12
R1G	Russell 1000 Growth	1979m3	2019m12
R1V	Russell 1000 Value	1979m3	2019m12
R2	Russell 2000	1979m3	2019m12
